

Annexure 1 – Cue Cards

CUES: -

For: (Group A)

1. The issue of garbage and litter in the park needs to be addressed immediately. As it is causing a harmful impact on the environment and people's health. It is also causing foul smell. Since, citizens are troubled with it, so they should act.
2. Lot of insects, flies, mosquitoes are breeding, and stray animals are getting attracted to the garbage. People using or staying nearby the park can fall sick. In interest of everyone's health, people need to take quick action.
3. There is no system for garbage disposal or waste management in that area so impacted people need to find solution how garbage disposal can be managed. More dustbins can be arranged, or waste segregation.
4. Citizens can reach out to garbage collectors to come regularly to collect garbage. They can pay to garbage collector for coming twice as this is serious issue.
5. Citizens must take responsibility while throwing the garbage. They should throw at right place and avoid dumping more garbage if dustbin is already full. They should also be aware of the adverse impact of it.
6. Citizens are responsible for the reducing waste generation. For example, like bottles can be used at home to store stuff.
7. It is essential to solve the issue, and people are accountable for their actions and dispose of garbage properly.
8. The park is a public space and people use it then why authorise should clean it. People need to keep it clean and free of litter to ensure that they can enjoy it and they should play their duties about it.

Against: (Group B)

1. It is the function of the concerned authorities to manage the garbage and it is the duty of citizens to help in this waste-management. Both need to work together continuously to keep the issue in check.
2. In interest of public health, people using the park or staying nearby the park should bring this issue immediately to concerned authorities' notice. In collaboration they can get it resolved to avoid spread of ill effects by mosquitoes & other insects breeding.
3. Citizen's action alone, can be only temporary solution, but if they collaborate with concerned authority and find the solution of this problem it can be resolved for good. The authorities can arrange for different types of dustbins to segregate waste, also arrange for additional dustbins, etc.
4. Citizens can reach out and collaborate with concerned authorities to help oversee and monitor that garbage collectors are coming regularly. They can bring to authorities notice about need of garbage collection to be twice in a day & it can be arranged.
5. Authorities and citizens should collaborate to spread awareness messages. They can decide what can be the fine impositions in case rules are not followed to keep the park zone litter free.
6. Citizens can Volunteer with authorities to run awareness campaigns for waste reduction, recycling, cleanliness drive, etc.
7. Concerned authorities should be proactive to solve the issue and need to take responsibility for management of garbage disposal issue for benefit of the people. But alongside citizens also must follow their duties. So, both need to fulfil their responsibilities for the issue to be resolved.
8. To ensure that such problems don't arise again & again, authorities and citizens should engage proactively. Authorities should set systems and procedures and citizens should help ensure that they are followed.
